Tips for employees

Keep healthy

The healthier you are, the better chance you have of being less affected by the virus. Eat local kaikai, remember your fruit and vegetables and drink plenty of water.

Personal and home hygiene

We suggest you stock up on cleaning and antibacterial supplies in case of an outbreak. Please refer to the Coronavirus spread and prevention guide to see how you can reduce you and your family from infection.

Cleaning and antibacterial products can be expensive and may even run out at retail shops. Good news is that there are natural antibacterial products you can use – white vinegar, hydrogen peroxide, rubbing alcohol (or white spirits such as vodka), essential oils such as lemongrass, and lemons!

Food security

Local markets may close, supermarkets and retail shops may close. Rice may stop arriving from overseas. Make sure you have a stock of cans or long life goods. Consider how you may access gardens for fresh vegetables and fruits.

Cash

Banks may close. Make sure you have some cash on hand for an emergency situation.

Medication

Chemists and hospitals may run out of specific medicines that are imported, if you need daily medication make sure you have a month's supply so that you are not affected.

DO NOT PANIC

We advise to take a "hoping for the best, planning for the worst" approach to planning for what the effects could be of the Coronavirus pandemic. If you need more information or just want to talk to someone please contact VCCI on 27543 or email information@vcci.vu
